

黑龍**緩步**朝洞穴出口走去，來到懸崖邊緣，振動牠巨大的**革質雙翼**，拍了三下，飛向灰黯的天際。愈飛愈高，進入暴風圈，急速越過烏雲和大雨。

夜幕**漸漸低垂**，天空不時出現閃電，照亮牠身上**如黑曜岩般墨黑堅硬的鱗片**。牠身上的黑與**恆常黑暗**的天幕化為一體，成了一抹黑影，融入**初臨**的狂暴之夜。

初, 漸漸 vs 恆常

The creature **ambled** toward the entrance of the cave and moved to the precipice of the cliff. It beat its massive **leathered wings** three times and took flight into the dusky sky.

It rose higher and higher into the stormy elements, racing through cloud and rain. Lightning flashed intermittently, revealing rock-hard, **obsidian black scales** as it flew into the **coming night**. Its blackness merged with the **ever-darkening** sky, a black shadow that blended into the young, violent night.

**ever-darkening** 一直都是會變黑--因為黑夜總會降臨，每日都會到來的黑夜. **darken** 有**變黑**的意思  
to become dark; to make something dark

讀中文，看看邏輯是否說得通？再檢查英文。天色會變，恆常黑暗的天幕，就是不通了！
